

'Neam de Gospodari' Agricultural Association

Activity Report – year 2020

The year 2020 passed like a storm and left behind imbalance, wonder, questions and a lot of anxiety.

It swept in its way businesses, customs, and pieces of life as we knew it. It sent us to work from home, taught us new things and put us face to face with another reality, with a new context, to which we all adapted.

For the 'Neam de Gospodari' Agricultural Association, the context of 2020 meant a reconfiguration of the route, the pause of some projects and the focus on emergencies.

We were closer to the community. We have supported people and institutions on all levels to contribute to a 'further' and a 'future' for which we build every day. Here, we are in the middle of the community and we believe that our mission is to support growth, in any context.

We contributed to:

The health of the people of Bacău

The sports of Bacău

The life of the people of Bacău

6 Local and regional projects worth over Lei 600,000

**Our investments and actions covered not only Bacău, but also the area of Moldova.*

Project

Support for the arrangement and endowment of the microbiology laboratory for COVID 19/SARS COV 2 testing at the Bacău County Emergency Hospital.

Because 'emergency' was the term under which we acted this year, this was also the case of the support provided for the arrangement and endowment of the laboratory for COVID 19 testing.

After the first worrying signs of the pandemic and consultation with city decision makers, it was clear that testing for molecular diagnosis (**Real Time PCR**) will be essential for the community and our health.

The new pandemic context forces us to rethink our lives; therefore, investing in health and especially in infrastructure to ensure comfort and safety at the local level was a priority in 2020 and remains a top spot on our list for 2021.

Project start date:18 th March 2020	Project duration in number of months:3 months
The total amount of the complete project SJU Bacău = arrangement and endowment of microbiology laboratory	200,000 EUR
The amount of the project AGRICOLA Association- Support for microbiology laboratory arrangement	Lei 250,000

2. Project: Support for endowment with protection and hygiene materials for the Bacău Emergency Situations Inspectorate

This year also meant the integration into our lives of protective materials, masks and disinfectants, in a new way and in much larger quantities. The challenge came for all institutions, and we, the AGRICOLA-Neam de gospodari Association, sponsored protection and hygiene materials that are specific and necessary in all the actions undertaken by ISU Bacău in the plan to combat and limit the effects of the COVID 19/SARS COV 2 pandemic.

Materials needed:

Disposable latex gloves, sizes M and L.

- Universal disposable boots
- IDZ surface disinfectant, without rinsing

- Hand sanitizer
- Disinfectant liquid soap

Project start date: 22.12.2020	Project duration:2 months
Amount:	Lei 150,000

The Project - 'Ridicăm mingea la fileu'- Pro Știința Bacău Foundation

The competitive sports have been hit by the context of the COVID 19/ SARS COV 2 pandemic.

Without financial incentives, training conditions, without a constant income, athletes were forced to give up, to change direction, to look for solutions elsewhere.

We support sports, healthy living and invest in community elites. And women's volleyball is a point of reference for the Bacău community.

So the moment when the ȘTIINȚA Bacău team was left without 8 members in the team, and after completing the group, at the end of the round, after 11 stages and after 6 matches won, the team was in the middle of the ranking, we responded to the need.

Bacău sports need support, and a standard segment - such as women's volleyball - deserves to remain in the ranking, and we can be part of the solution, because we are part of the community.

The project 'Ridicăm mingea la fileu', worth 150,000 LEI means:

- A. athletes housing rental = 25,000 LEI
- A. athletes transport = 15,000 LEI
- C. sports activity contracts for the competitive year 2020-2021.110,000 LEI

Project: Support with food Betesda - Maranatha Christian Charity Mission and Help Association:

Ray House (<https://www.casaray.ro/ro>), a children's home in Dobreni, was founded 25 years ago and currently houses 20 children. Unfortunately, their 'mother', Tatiana Gavril, and the one who took care of the smooth running of the home's activity died in the fire at the Neamț County Hospital.

Because the needs of the rest are many and urgent, we came to their aid by providing a part of the food needed to cook the 2300 meals a month.

Project start date:18th December 2020	Project duration:2 months
Food products in approximate value of:	Depending on the sponsorships attracted

P10.The Project '**Sprijin financiar a unei persoane cu dizabilitati pentru achizitia unui carucior cu rotile electric**' (*Financial support of a person with disabilities for the purchase of an electric wheelchair*)

Without his left hand and with both legs amputated, Ninel Constantin Adrian has little chance of a normal life. But even in the absence of a wheelchair, he seemed doomed to isolation and helplessness. The train accident that changed his life did not give him the option to move on.

Ninel needed an electric stroller for his life to enter a new path, so we came to his aid, and at the end of 2020 he received the stroller that helps him be more independent.

Project start date:30.10.2020	Project duration:1 month
Amount:	3100 LEI

The Project: '**Vlad învinge canceru**' (*Vlad defeats cancer*)

Vlad Stefan Snel played volleyball, football and also attended the 'George Apostu' High School of Arts in Bacău, painting department.

Suddenly, in early 2020, Vlad began to have dull, then acute hip pain. In a few days, his gait deformed, and then the story gallops through tests and fears until the diagnosis of bone cancer - Ewing's sarcoma. A tumour of a fabulous size, compared to how a tumour grows:22cp occupying the entire iliac bone.

Vlad needs surgery abroad to allow him to replace the affected iliac bone with a prosthesis made of human bone material, specially designed, which will ensure his development

without affecting the level difference between the two legs. This is possible at Sant`Orsola Hospital in Bologna - Italy or at other hospitals abroad. The cost of this operation is about 120,000 EURO.

And part of Vlad's fight is us.

Project start date:31.12.2020	Project duration:1 month
Amount:	50,000 LEI

President Mr.Daniel Bitere

Vice-President Mr.Cristian Calin
